Front-End Developer specializing in high-performance web solutions. With over two years of hands-on experience in both modern SPAs and CMS development, I apply my Computer and Systems Engineering background to build robust systems. I excel at applying algorithmic efficiency to scalable React/TypeScript projects and managing/optimizing WordPress sites, including basic PHP. My focus is always on delivering stable, maintainable code and a superior user experience.

WORK EXPERIENCE

WordPress Developer   Freelance(part time) - Egypt   4.2025-Present

- Developed and maintained multiple WordPress websites, including a real-life booking platform (AWA) similar to Booking.com.
- Implemented custom plugins for secure payment gateways, real-time data processing, and push notifications.
- Managed content, ensuring proper formatting and responsive design for a seamless user experience.
- Used over 30 WordPress plugins, including essential ones for SEO, security, and performance optimization.
- Fixed issues with broken links, images, and other technical problems across various websites.

WordPress Developer   Freelance(part time) - Egypt   11.2024-4.2025

- Built a car rental website (Euro Motors Website) using WordPress, customizing a plugin-based theme and fixing technical issues.
- Created a knowledge base website with interactive forums for user engagement, ensuring smooth functionality.
- Applied SEO best practices and resolved technical issues related to website performance and structure.

Front-End Developer   Freelance(full time) - Egypt   4.2023-5.2024

- 2 years of experience in front-end development, building and maintaining web applications for various industries.
- Worked remotely on several real projects, including e-commerce platforms, business websites, and interactive web applications.
- Proficient in HTML, CSS, JavaScript, and React for developing responsive and user-friendly interfaces.

WordPress Developer   Freelance(full time) - Egypt
1.2023-5.2023

- Built and managed a client-focused WordPress website that enables clients to report issues via photo submissions and track resolution through a dashboard.
- Developed a custom dashboard to streamline internal task management, allowing workers to complete job-specific tasks efficiently.
- Implemented plugins to customize worker roles and ensure that certain requests were tied to specific orders, enhancing process management and simplifying workflow.
- Ensured smooth site functionality by maintaining the site's user interface, managing content uploads, and optimizing layout consistency across devices.
- Provided ongoing support by fixing technical issues such as broken links, misaligned images, and other bugs, ensuring a seamless user experience.
